Carpathia Government Solutions' General Manager to Speak at Cyber Security Conference

Ashburn, VA – January 19, 2010 - Carpathia Hosting, the leading provider of enterprise managed hosting services for government agencies and businesses, announced today that Seth Finkel, General Manager of Carpathia Government Solutions (CGS), will speak about data security in cloud computing on January 28 at 11:15a.m. at the Business of Cyber Security Conference.

Carpathia Hosting, which commands one of the most impressive rosters of federal agencies under management, currently delivers cloud solutions for a diverse range of government entities. Additionally, Carpathia is redefining the secure hosting market with a comprehensive suite of compliant hosting and IT management services — ranging from traditional colocation and managed hosting to compliant cloud services delivered via the most secure, federally-compliant hosting facility in the world, located in Dulles, VA.

"Security has been routinely cited as one of the key concerns regarding the adoption of cloud-based services for enterprises and government agencies," said Finkel. "For those who want to leverage the benefits of this compelling IT delivery model, it's important to proactively assess risk and determine roles, responsibilities, technologies and outputs to ensure security and compliance needs are being met."

Carpathia Hosting is also known for creating the first managed cloud solution designed for enterprises -- Carpathia AlwaysOn/InstantOn™. This unique solution is comprised of two components – Carpathia AlwaysOn™, using Carpathia Managed Hosting services, and Carpathia InstantOn™, utilizing Carpathia's cloud computing platform to offer seamless integration of cloud and dedicated resources. Used together, Carpathia Hosting calls this unique approach Carpathia Cloud Orchestration™. This hybrid model provides the security, availability and reliability of a traditionally hosted environment paired with instant access to cloud computing and storage.

Hosted by the Tech Council of Maryland, the 2010 Business of Cyber Security Conference will be held from 8 a.m. to noon on Thursday, January 28 at Johns Hopkins University on the Montgomery County Campus in Rockville, Md. This half-day conference will feature security experts in protecting companies from cyber threats and experts that assist companies in finding business within the expanding field of cyber security. For more information and to register for the event, visit https://techcouncilmd.com/events/detail.php?list=Events&laction=detail.php&evt_id=223.

Carpathia Hosting will also participate in a host of other federal networking events in the first quarter of this year, including the AFCEA Monthly Luncheon, FedSources InFocus, BIBA Conference, AFCEA Beyond SOA and Cloud Conference, SaaS/Gov, and FOSE.
